

Khawlah Al-Hebshi

Flutter Developer | Mobile Application Developer

Yemen — Open to Remote / Relocation | +967 778 048 085 | khawlahalhebshi@gmail.com | github.com/khowlah | linkedin.com/in/khowlah-al-hebshi-12046a38a

PROFESSIONAL SUMMARY

Flutter Developer and recent Information Technology graduate (Software Engineering track, Seiyun University, 2026) with hands-on experience developing cross-platform mobile applications for Android and iOS using Flutter and Dart. Practical training experience integrating RESTful APIs and backend services (Firebase Firestore, Firebase Authentication) into functional mobile app features, gained during a software development traineeship at Namo Soft and through independent project work. Foundational, hands-on experience with Flutter unit testing, basic performance-conscious development practices, and building signed Android release builds (APK/AAB). Exposed to the application development lifecycle end-to-end — requirements analysis, UI/UX design, feature implementation — within a professional team environment. Holds a Udemy certification in Flutter development and has hands-on experience using Claude AI for prompt engineering to support development workflows. Detail-oriented and motivated to grow as a Flutter Developer within a collaborative engineering team.

TECHNICAL SKILLS

Mobile Development (Flutter): Flutter SDK, Dart, Cross-Platform Development (Android & iOS), RESTful API Integration, State Management, Material Design, Responsive UI Design, Clean Code Principles, Local Data Persistence (SharedPreferences)

Backend & Data: Firebase (Firestore, Authentication), RESTful APIs, SQL, Relational Database Design

Software Practices: Software Development Lifecycle (SDLC), Software Requirements Analysis, Git, GitHub, Version Control

Testing & Build: Unit Testing (flutter_test — foundational), Performance-Conscious Development Practices, Android Release Build & Signing (APK/AAB)

Programming Languages: Dart, Python, Java, C#, C++

Other: HTML, CSS, Prompt Engineering (Claude AI)

PROFESSIONAL EXPERIENCE

Namo Soft — Software Development Trainee May 2025 – July 2025

- Contributed to Flutter mobile application development, working hands-on with state management and RESTful API integration to connect app features to backend data.
- Analyzed business requirements and translated them into functional software application features, working directly with a professional development team.
- Gained direct, hands-on exposure to the application development lifecycle — from requirements analysis through implementation — in a real-world team setting.

PROJECTS

Shoe Store E-Commerce Mobile Application (Customer App & Merchant App) Team Project

- Collaborated with a teammate to design and build two cross-platform Flutter applications for Android and iOS — a customer-facing app and a merchant-facing app — for managing an online shoe store end to end.
- Integrated Firebase Firestore as a real-time backend service to store and manage product data, and Firebase Authentication to implement secure user sign-up and login.
- Contributed to requirements analysis, UI/UX design, and feature implementation across both applications.
- Source code: github.com/khowlah

BMI Calculator Mobile App *Individual Project*

- Built a Body Mass Index (BMI) calculator application using Flutter and Dart, with a responsive, multi-screen interface and smooth navigation.
- Implemented user login functionality using SharedPreferences for local data persistence.
- Applied clean, organized code structure to implement the core BMI calculation logic.

CERTIFICATIONS

The Complete Flutter Development Bootcamp — Udemy, October 2025

English Language — Upper-Intermediate (Passages Program), Hadramout Languages Institute, 2021

LANGUAGES

Arabic (Native) | English (Advanced — certified Upper-Intermediate in 2021, progressed since)

EDUCATION

Bachelor of Information Technology — Software Engineering Track

Seiyun University — Graduated June 2026
